

Gabor Ulenius

FULL STACK DEVELOPER

Profile

Full Stack Developer with experience building cloud-native web applications, AI-powered healthcare solutions, and mobile-first products. Currently working at Tieto Caretech on Finland's largest healthcare data platform, with hands-on experience in **React, TypeScript, Node.js, GraphQL, PostgreSQL, Docker, Kubernetes, Terraform, and Azure**. Strong interest in scalable product development, user-focused interfaces, and AI-assisted workflows.

Employment History

Full Stack Developer, Tietoevry, Espoo

JUNE 2023 – PRESENT

Developing cloud-native, AI-powered healthcare applications for Finland's largest healthcare providers. Working with **React, TypeScript, Node.js, GraphQL, PostgreSQL, Docker, Kubernetes, Terraform, Azure Cloud, Databricks** and **Azure DevOps** in **Agile Scrum** teams.

Key contributions:

- Contributing to the [HUS DataLake](#) platform, improving access to healthcare data used by Finland's largest hospital district.
- Built an [AI-powered proof of concept](#) for medical document analysis, helping explore faster symptom-based diagnosis workflows.
- Developed an LLM-based AI solution for ICT Days, Finland's largest healthcare tech event

Junior Full Stack Developer, Anyhau, Espoo

DECEMBER 2022 – APRIL 2023

Contributed to a [greenfield marketplace-style web application for animal-related services](#), focusing on provider listings, customer booking flows, and frontend/backend feature development with **Next.js, Typescript, Material UI**, and **MongoDB**.

Projects

The Explorer – Offline-first research platform for Android, iOS, and Web

NOVEMBER 2025 – PRESENT

Built an offline-first field expedition platform with mobile apps for Android and iOS and a web app for reviewing and managing collected data. Supports multiple expeditions, offline maps, GPS tracking, zone creation, voice memos, 12 log categories, advanced filtering, data export, notifications, and cloud sync after reconnecting. Shared expeditions are joined via invitation links, with owners having additional management permissions.

Education

Computer Programming, Hive Helsinki, Helsinki

OCTOBER 2021 – MAY 2023

Completed a project-based program focused on teamwork, problem-solving, and self-directed learning. Built skills in collaboration, critical thinking, and adaptability for real-world software development.

Finnish Language Studies, A2 Level, SataEdu, Rauma

NOVEMBER 2016 – JULY 2017

Continued self-studies in Finnish. Now converse comfortably and keep improving.

Certificate

Azure Fundamentals AZ-900, Microsoft

Languages

- Finnish** – Fluent conversational, continuously improving technical vocabulary
- English** – Fluent
- Hungarian** – Native
